

## Head of Quality

### Job Description

Responsible to plan, direct, coordinate and report on any of the Company's projects and always aiming for the quality of the project delivery (efficient, timely and cost effective). To execute your role successfully you will require excellent planning and interpersonal communications skills to manage relationships inside and outside MGRC.

#### 1. Quality Standards

- i) Establish, communicate and implement operations-related policies, practices, and standards to ensure effective and consistent operations across MGRC.
- ii) Lead MGRC's quality assurance efforts, manage its change control and document control, ensure conformity with quality standards, and manage corrective action when required.
- iii) Identify creative ways in which the company can balance its economic obligations with its environmental, social and governance obligations.
- iv) Prepare MGRC's annual sustainability report for inclusion in its Annual Report to shareholders.
